

Environmentally Preferable/Green Lighting: You know it's the right thing to do, learn how to get it done.

Mark your calendar for a FREE one-day workshop, *How to Purchase Green Lighting Equipment*, which will take place on **Monday, November 7, 2005** in the conference center of the Association of Bay Area Governments (ABAG) in Oakland, California.

- Learn how environmentally preferable lamps and ballasts can dramatically lower your energy bills, reduce your maintenance costs, and minimize your impacts on the environment. "Green lighting equipment" means products that are:
 - o Energy efficient - produce more light for each watt
 - o Longer lasting - reducing replacement and recycling costs
 - o Less environmentally hazardous - containing less mercury and lead
- Learn how to **write bid specifications** for green equipment
- Hear **lighting manufacturers** talk first-hand about the environmentally preferable products they offer
- Get the details on the **new statewide lamp recycling requirements** that are scheduled to take effect February 2006, and obtain resources that will make it easier for you to comply
- Find out how to **earn lighting-related credits** under the US Green Building Program's LEED standards

Time: 9am to 4pm (registration begins at 8:30am)

Location: ABAG: 101 8th Street, Oakland, CA 94607

Directions: See http://www.abag.ca.gov/about_abag/map.html

Sponsors: ABAG's Local Government Energy Partnership

Alameda County General Services Agency

Bay Area Green Business Program

US Environmental Protection Agency (Region 9)

Presenters: LGEP, Lighting Wizards, EnviroSpec and California Department of Toxic Substances Control

To reserve your space, please contact Kate Merrill, Local Government Energy Partnership at katem@energy-solution.com or at 510.482.4420 x223. *Lunch and beverages will be provided.*
