

# Association of Bay Area Governments

## Intergovernmental Review Newsletter

Issue No: 300

A Newsletter from the Association of Bay Area Governments of Projects Affecting The Nine-County San Francisco Bay Area

Guide to Newsletter: Project applications shown in the Newsletter are received and published monthly to notify local governments and other parties about programs requiring intergovernmental review and projects of special significance. For more information, call either the ABAG Clearinghouse at (510) 464-7993 or the contact person.

ABAG Clearinghouse Numbe 15034

**Impace Area:** Solano  
Recieved from: City of Rio Vista-Department of Public Works  
Applied to:  
Project: City of Rio Vista Water System Improvement Porject  
The Cit's domestic water supply is provided from 8 wells, 3 of are inoperative due either to low flow or arsenic levels above 1 Maximum Concentration Level (MCL) of 10 ppb. Well 10, the water producer has been tested and at all depths the arsenic concentration is above 10 ppb (cf Table 2). The water from w 13 and 14 (cf Table 1) is blended in a 2 million gallon tank to an effluent below 10 ppb. The concern is that as the arsenic concentration in these wells varies due to pumping rates and/ changes in the aquifer, it will not always be possible to botain of effluent below 10 ppb. T guarantee an adequate quantity a as a safe water supply for the City, it is essential that the concentrations of arsenic not exceed the MCL of 10 ppb at an especially during the dry season. Tests to determine the mos economical method for the arsenic abatement of these wells I completed within two-three weeks. Arsenic abatement of the from these wells is the only method to guarantee safe drinking for the City.  
Cost: Total \$3,000,000.00 Federal \$3,000,000.00  
Contact: Hector De La Rosa (707) 374-6451
